Examples of Entry Level Jobs in the TB Branch

Program Evaluation Consultant

- Performs evaluative and process improvement of TB activities.
- Maintains internal database/promotes data integrity by reporting accurate information.
- Development of monitoring/reporting/data analysis for testing activities.
- Provides evaluative recommendations and technical assistance to local health department programs on TB prevention and case management.

Public Health and Prevention Specialist III

- In collaboration with the TB Nurse Lead, develops treatment plans.
- Provides directly observed therapy and directly observed preventive therapy.
- Completes audits/reviews to ensure treatment guidelines are met.
- Develops educational tools on underlying medical conditions as they relate to communicable diseases.

Public Health Nurse III

- Plans, develops, and coordinates comprehensive Tuberculosis nursing services.
- Ensures that all TB patients, suspects, contacts, and positive reactors receive appropriate nursing care and case management.
- Conducts TB awareness events and continuing education for health care professionals.

Interested in next steps? Consider gaining experience with community health, health education, communication, and program planning. Some positions with nursing capacities will require licensure to be a Registered Nurse.
