

Texas Birth Defects Registry (TBDR) Annual Report Appendix B. Modified BPA Codes Used to Define Birth Defects

Diagnoses in the Texas Birth Defects Registry are coded using a system developed and provided by the National Center on Birth Defects and Developmental Disabilities (NCBDDD) of the Centers for Disease Control and Prevention (CDC). The six-digit birth defect codes, commonly called modified BPA codes, are based on the British Pediatric Association Classification of Diseases (1979) and the World Health Organization's International Classification of Diseases, 9th Revision, Clinical Modification (ICD-9-CM) (1979), with code modifications developed by the NCBDDD and by the Birth Defects Epidemiology and Surveillance Branch of the Texas Department of State Health Services.

The table below shows the birth defect codes used to define the conditions shown in this report.
