

Texas Medical Home Workgroup (MHWG)

Five Year Strategic Plan

MISSION & VISION

MISSION To enhance the development, and promote the principles of the Patient-Centered Medical Home model within the state of Texas for all children and youth including those with special health care needs.

VISION All children and youth in Texas, including children with special health care needs (CSHCN), will have a medical home that provides accessible, family-centered, continuous, comprehensive, coordinated, compassionate, and culturally competent services.

STRATEGIC ISSUES

1. Families, providers and other key stakeholders need education, resources, and support for medical home development activities
2. The statewide promotion and focus of medical home implementation needs to continue to be expanded
3. To improve outcomes, best practices related to medical home should be collected and disseminated in practice
4. Partnerships between providers, families and other key stakeholders need to be strengthened
5. Support, education, and advocacy are needed regarding reimbursement for services provided within the context of a medical home
6. Youth without medical homes are less likely to successfully transition to adulthood

BEST PRACTICES* & THEORETICAL FRAMEWORKS

- Joint Principles of the Patient-Centered Medical Home¹
- Standards for Systems of Care for Children and Youth with Special Health Care Needs (CYSHCN)²
- Life Course Framework
- National CLAS Standards³

FOUNDATIONAL ACTIVITIES

- Engagement
- Education
- Assessment
- Promotion of medical home best practices
- Supporting value-based payment principles
- Building strategic partnerships
- Collaboration
