

TEXAS DEPARTMENT OF HEALTH  
FISH AND SHELLFISH CONSUMPTION ADVISORY

ADV-13

Samples of fish taken from the Neches River in the area covered by ADV-2 indicate that the levels of dioxin have decreased to an acceptable level. Additional samples did not indicate any other contaminants of concern. Therefore, the fish consumption advisory for the Neches River south of the U.S. 96 bridge near Evadale to the Interstate 10 bridge near Beaumont is hereby rescinded.

This advisory rescinds ADV-2 issued on September 19, 1990.

Issued this 5th day of December, 1995
